-----

The study presented an important topic that would be of interest to the readership of this journal. Most research is needed, including the international audience. However, in its current form, the research doesn't match what is wanted and the surveys do not provide relevant data. It is missing a level of detail needed to understand the study result, and the impact of the results as well as the research contribution.

Perhaps the authors are likely close to the topic that they are skipping over details that they know, but the reader would not.

Overall, the paper requires more information and focus. The areas requiring attention are highlighted in the individual sections. In summary, the paper needs

- a re-write of the abstract to give an adequate summary of the paper and mention the key concepts.
- expanding the introduction by clearly stating the research problem to suitably inform the reader.
- A synthesized and structured critique of the literature.
- clarifying the research procedures with an adequate explanation of the methods.
- Expanding the discussion to allow writing a well-developed conclusion summarising the entire paper.
- The outcomes should be discussed in relation to the existing research.
- emphasizing the significance of the research - a clear showing of how the findings contribute to new knowledge.
- Using results to adequately support the claims in conclusion, and how the results of the research can be used for future research
- A more recent bibliography is necessary. Remove all outdated references! Furthermore, the reference list of new publications is a little bit weak.

Recommendation: Revisions Required
